MULTI AGENCY WIRELESS SOLUTION

Secure multi agency WiFi solutions to improve efficiencies, achieve your clinical mobility and Digital by Default roadmap requirements

“The Wireless solution is great because our staff are no longer having to schedule time to go back to their base at the end of the day to update their notes in the clinical system. We are saving both time travelling and in terms of writing notes to later input in the clinical records. We are now putting the information into the clinical records in real time, and have reduced the risk of forgetting or missing information, which has reduced clinical risks.”

Sally Holman, Head of Clinical Systems and Projects at NHS Dorset HealthCare

Service

Our team of NHS IT experts work with customers to scope, design, plan and deliver a secure, centrally managed WiFi Infrastructure solution, to overcome challenges in the use of mobile devices and to enable clinical users to seamlessly roam across local health organisation locations.

Saving time, realising improved efficiencies and fully empowering care givers by connecting easily and

seamless to their systems from any site to drive adoption and usage across the various organisations and user groups within local health locations.

The solution is ideally placed to realise the NHS's Digital by Default mantra, enabling conscious self-care by patients and carers through access to the growing suite of apps and on line health systems helping protect NHS resources.

Healthcare Computing
Your trusted NHS IT partner
