MOBILE WORKING SOLUTIONS

Available and secure Mobile Working solutions to achieve your mobility requirements and NHS's Digital by Default roadmap goals

"This solution is great because we are no longer having to schedule time to go back to our base to update notes in the clinical system. We are now putting the information into the clinical records in real time, and have reduced the risk of forgetting or missing information."

Sally Holman, Head of Clinical Systems and Projects at NHS Dorset HealthCare

Service

Our team of NHS IT experts work with customers to scope, design, plan and deliver central, scalable infrastructure and VPN solutions to overcome challenges of remote working.

Our infrastructure experts can centralise data and implement Virtual Desktop Infrastructure for a seamless access to systems and data from disparate healthcare sites, or from workers' homes.

Features & Benefits:

- ✓ Cost savings
- ✓ Workforce efficiencies
- ✓ Secure, IGSoC compliant
- ✓ Data and systems available anywhere
- ✓ Scalable infrastructure

Services:

- ✓ Virtual Desktop Infrastructure
- ✓ Central, scalable VPN solutions
- ✓ Design and build
- ✓ Mobile device encryption
- ✓ Mobile device management
