

CSU, CCG & GP Practices

NHS CYBER SECURITY SOLUTIONS

HC works in partnership with NHS organisations to provide pro-active protection against malicious software threats

“There is a new level of threat that exists and we need to stay vigilant. It is important to run windows updates regularly, be cautious about opening email attachments or accessing personal email accounts on work computers.”

Service description

HC have gained 'Cyber Essentials Plus' a Government backed Cyber Security certification. Demonstrating to our customers that Cyber Security controls have been implemented. Our HC experienced Consultants deploy comprehensive security solutions, in different areas protecting wired and wireless implementations with enterprise grade suite of security services. Deployment of Next Generation Firewalls, providing cloud and on-premise security solutions on the Perimeter and within the GP Practice network.

GP Practice desktops and Laptops are protected with a centrally managed Anti-Virus solution, providing up to date patches, further protecting against the Cyber Security landscape.

We deploy Public Key Infrastructure (PKI) providing SSL/TLS security for services that require secure usage.

HC working in partnership with the CSU's and CCG's centrally manage a windows patch management solution, updating the endpoints within the GP estates on a regular basis, significantly reducing Cyber Security threats. Deployment of Bitlocker enabled PC's and Laptops, a hard drive encryption and security program, providing protection against device theft and malware that attacks the boot and system files of the PC, safeguarding against Patient Identifiable Information.

Our NHS Cyber Security solutions will help maintain your network and IT systems secure and protect vulnerabilities within your IT infrastructure.
