WINDOWS 10 DEPLOYMENT TO DESKTOPS AND LAPTOPS

Windows 10 deployment deadline is due soon, now is the time to plan your migration and HC can help you design and deliver the most cost and time effective solution

“The overall experience was very good. Very little disruption to the staff during the windows upgrade. The engineer was brilliant. He ensured that everything was in full working order and also made a follow up call a couple of days after the completion to enquire that everything was still working for all staff. Thank you for the brilliant service.”

Sharon Cox - Practice
Manager at *The Wilson Practice*

Problem

With the NHS extending support until January 2021, you may be feeling very relieved you don't need to worry about delivering a large scale and complex migration project soon. But we urge you not to delay planning your project too long because the new deadline will come around in no time!

At HC, we know all about how difficult Primary Care IT projects can be to deliver, with so many disparate sites, this alone makes running an IT project much harder than in a large corporate network, add into the mix GP Practice owned and controlled applications and its no wonder these type of complex projects get put to the end of the list. But delaying migration to Windows 10 could cause you serious problems such as cybersecurity and cyberthreats, and software and hardware compatibility issues.

If you do not want to put your NHS organisation under those risks, start planning your migration to Windows 10 today.

Solution

At HC, we can help you design the most cost and time effective solution to migrate your estate to Windows 10. We have proven track record completing large-scale Primary Care projects, we've rolled out Windows 10 migrations to over 7,000 devices and are currently delivering Windows 10 projects across 20 CCGs in the South East of England, migrating over 20,000 devices by the end of the year.

Customer service is at the heart of everything we do, supporting our customers in delivering the best possible outcomes in the most cost and time effective way is core to our values and ethos.

Why us?

Project Management

Our experienced Windows 10 Project Managers are all Prince2 certified, using our tailored specialist methodologies to take full responsibility for delivering projects through the whole project lifecycle.

We can work closely with your internal stakeholders to design a customised project specifically tailored to meet your unique requirements, whilst keeping you regularly informed and updated until the project is completed.

Engineering

Our technical teams have a wealth of experience delivering technical solutions in Primary Care backgrounds. We develop flexible and scalable technical approaches for our

customers and could work with you to build the right approach either using tools you already have or utilising our own trade and tested approach's.

We have an excellent understanding of Third-party application compatibility with Windows 10 and wide knowledge of customise tools to support the Windows 10 migrations experience.

Project coordination

With our projects, your NHS organisation will have a dedicated Project Coordinator who will take care of all the booking, scheduling, logistics and resource management, taking the day to day pain out of the project away from you.

Benefits

Delivering cost and time effective solutions across the South of England

Tailored PRINCE2 certified project management

Customise technical approach: Best practice methodologies

Excellent feedback rates with over 96% of positive user feedback

Over 100 years combined engineering experience delivering Primary Care IT projects

Vast experience delivering Primary Care IT Projects for over 20 years

Healthcare Computing is a specialist provider of NHS IT Infrastructure and Support services. With over 20 years' experience of NHS IT we work in partnership with our customers providing specialist NHS IT Services and Solutions to GP Practices, CCGs, CSUs & local health economies.
